Parrot Blue Tooth Hands Free with Remote

The CK 3100 with LCD display screen is one of the most advanced hands free car kits on the market. With the Parrot CK3100 LCD you are able to place or receive calls safely without ever touching your mobile phone. The connection between the Parrot CK3100 LCD and the Bluetooth phone and its voice recognition system means the driver only needs to say the name and the kit automatically dials. The car speakers accurately reproduce the callers voice and the radio automatically mute when a call is received allowing for a clear and smooth conversation.

Hella (LED for ultra low power consumption) Daytime Running Lamp Kit

Hella has designed a solution to improve and enhance the visibility of vehicles without the disadvantage of increased fuel consumption and bulb failure. The use of Daytime Running Lamps (DRL) maximises your vehicle visibility. A reduction of over 95% in energy consumption is also achieved when compared to the use of dipped headlamps during daylight hours.

Blaupunkt Melbourne Head Unit

If you have moved on from CD's and only listen to the radio, your iPod, or tracks stored on memory cards, the Melbourne SD27 is the ideal choice. This quality RDS radio receiver with front panel mounted SD/MMC memory card reader and AUX input stereo jack socket is easily up gradable to suit iPod, MP3 players, and external amplifiers. The Melbourne also offers an inexpensive commercial, agricultural, and industrial solution. Because this radio does not have moving parts such as a CD mechanism, it helps prevent faults caused by dust build-up and vibration.

Hella Daytime Running Lamp Kit **LED** For Ultra Low Power Consumption

Hella has developed a solution to improve and enhance the visibility of vehicles without the disadvantages of increased fuel consumption and bulb failure. The use of Hella LED Daytime Running Lamps (DRL) during daylight hours maximises your vehicle visibility. A reduction of over 95% in energy consumption is also achieved when compared to the use of dipped headlamps during daylight hours.

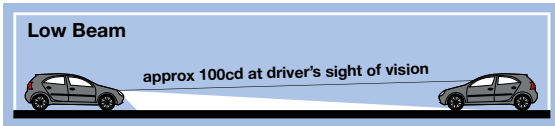

Featherlight™ 150 grams
Suitable for Mounting on Plastic Trim

Be Safe Be Seen Maximise Your Vehicle Visibility

It is acknowledged from in-depth accident studies that failing to see another road user in time (or at all) is a contributing factor in 50% of all daytime accidents. For daytime intersection accidents this increases to as much as 80%.

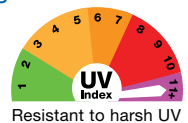

Dipped Beam Headlamps optically designed to light up the road with approximately 100cd at driver's sight of vision.

LED Daytime Running Lamps designed as a forward facing signal lamp to enhance the visibility of a vehicle during daylight hours, provides a minimum legal 400cd.

Daytime Running Lamp Features:

- Energy efficient LED Daytime Running Lamps set the automotive industry benchmark for lowest power consumption (< 2 watts).
- Daytime Running Lamps activated when ignition is switched ON for 'never forget' safety enhancement.
- ADR compliant.
- Automatic switch OFF when headlamps are switched ON (DRL legal requirement).
- Fully Multivolt™ 9-33 volts for installation to 12 or 24 volt systems.
- Universal mount suitable for cars and commercial vehicles.
- These lamps are designed and manufactured in New Zealand for New Zealand's harsh environmental conditions and to withstand long-term exposure to very high UV levels without fading or embrittlement.

Polycrystalline Solar Panel

The Polycrystalline Solar Panel is made from a cell cast
from silicon making it more efficient so the size of the
panel can be smaller and produce greater output. The
Solar Panel frame is constructed from corrosion resistant
material then clear anodized, and the tempered low
iron glass provides better impact resistance and better
light transmission.
